

Different models in the past 12 months:

Model Name	Provider	Release Date	Knowledge Cutoff	Cost (per 1M tokens)	Context Window
GPT-4.5	OpenAI	Feb 27, 2025	Oct 2023	\$75 input / \$150 output	128K tokens
Claude 3.5 Sonnet	Anthropic	Jun 21, 2024	Early 2024	\$3 input / \$15 output	200K tokens
Gemini 1.5 Pro	Google	May 14, 2024	~Early 2024	Reduced pricing (~50% cut, varies)	1M–10M tokens
Mistral Large 3	Mistral AI	Dec 2, 2025	Unknown	\$0.50 input / \$1.50 output	256K tokens
Llama 3.1 (70B)	Meta	Jul 23, 2024	Dec 2023	Free (open weights)	128K tokens
Command R+ (08-2024)	Cohere	Aug 29, 2024	Mar 2024	\$2.5 input / \$10 output	128K tokens
Grok 2	xAI	Aug 20, 2024	Aug 1, 2024	\$2 input / \$10 output	131K tokens
Jurassic-2 Jumbo	AI21 Labs	Mar 9, 2023 (still active, updated 2024)	Mid-2022	Pricing based on input+output length	~8K–32K tokens (varies by size)

DBRX	Databricks	Mar 27, 2024	2024	Open source (varies by provider)	32K tokens
Qwen2-72B	Alibaba Cloud	Jun 11, 2024	2024	Free (Apache 2.0 license)	128K tokens

Few Public models:

Model Name	Provider	Release Date	Knowledge Cutoff	Cost (per 1M tokens)	Context Window
Llama 3.1 (70B)	Meta	Jul 23, 2024	Dec 2023	Free (open weights)	128K tokens
Qwen2-72B	Alibaba Cloud	Jun 11, 2024	2024	Free (Apache 2.0 license)	128K tokens
DBRX	Databricks	Mar 27, 2024	2024	Open source (varies by provider)	32K tokens
Mistral Large 3	Mistral AI	Dec 2, 2025	Unknown	\$0.50 input / \$1.50 output	256K tokens
Mistral 7B	Mistral AI	Sep 2023	Unknown	Free (open weights)	8K tokens
Falcon 180B	Technology Innovation Institute	Oct 2023	Unknown	Free (open weights)	65K tokens
GPT-4 Turbo	OpenAI	Nov 2023	Sep 2023	\$0.03 input / \$0.06 output	128K tokens

Claude 3.5 Sonnet	Anthropic	Jun 21, 2024	~Early 2024	\$3 input / \$15 output	200K tokens
Gemini 1.5 Pro	Google	May 14, 2024	~Early 2024	Reduced pricing (~50% cut, varies)	1M–10M tokens
Grok 2	xAI	Aug 20, 2024	Aug 1, 2024	\$2 input / \$10 output	131K tokens
Claude 4	Anthropic	Feb 2026	Unknown	TBD	TBD
Gemini Ultra	Google	Feb 2026	Unknown	TBD	TBD
Mistral Mixtral	Mistral AI	Feb 2026	Unknown	TBD	TBD
DeepSeek Falcon	DeepSeek	Mar 2026	Unknown	TBD	TBD
Mistral 8K	Mistral AI	Apr 2026	Unknown	TBD	8K tokens

Reasons to use the public models:

- **Cost Efficiency:** Public models like Meta's Llama 3.1, Alibaba's Qwen2, and Databricks' DBRX are free or open source, making them ideal for projects with tight budgets or for experimentation without incurring high costs.
- **Customization and Control:** Open weights allow developers to fine-tune and adapt models to specific domains or tasks, which is crucial for specialized applications.
- **Transparency and Trust:** Public models offer transparency in architecture and training data, which is important for research, auditing, and compliance.

- **Community and Ecosystem:** Public models benefit from active communities contributing improvements, tools, and integrations, accelerating development.
- **Avoiding Vendor Lock-in:** Using public models reduces dependency on proprietary APIs and pricing changes, offering more flexibility.
- **Educational Use:** Public models are excellent for learning, research, and academic projects due to their accessibility.
